## CYTOLONIAN WANTED

### **Job Title: IT Specialist / Business Analyst**

#### **Job Description**

We are looking for a motivated professional to join us as an IT specialist in Berlin, Germany. As a key member of our IT team, you will be co-responsible for the development and operation of our web-based matching platform CordMatch®. The coordination of external development, hosting partners and business experts of the healthcare sector is the main task of our department.

Your main responsibility will be to work in close collaboration with business and IT experts from our international partners as well as with customers in the healthcare sector. The analysis of business processes and user requirements will be one of your key tasks. Your main responsibility will be the specification of interfaces between external and internal systems and the coordination of the implementation process.

#### **Required Qualifications**

- A Bachelor or Master's degree in Computer Science or similar
- Familiar with Web technologies like XML, Spring, Hibernate, GWT, Tomcat, Java and mySQL
- Experience in Business Process Analysis and Requirements Engineering are a plus
- Expertise in the healthcare and/or eCommerce sector preferred

#### **Required skills**

- Ability to analyze complex matters independently
- Ability for conceptualizing and presenting complex matters in an organized and clear manner
- Flexible, responsible, stress resistant, goal-oriented
- Very good verbal and written communication skills in English and German
- Excellent social skills
- Willingness to travel (50% of time)

Interested? Send your resume and references to Vivian Persch ([cytolonian@cytolon.com](mailto:cytolonian@cytolon.com)).
