CYTOLONIAN WANTED

Job Title: IT Specialist / Quality Assurance

Job Description:

We are looking for a motivated professional to join us as an IT specialist in Berlin, Germany. As a key member of our IT team, you will be co-responsible for the development and operation of our web-based matching platform CordMatch®. The coordination of external development, hosting partners and business experts of the healthcare sector is a main task of our department.

Your main responsibility will be the Quality Assurance of our externally developed systems. Hence, you have to participate in the complete development process from design to operation to assure the fulfillment of development standards like FDA and GAMP 5. Additionally, you will be responsible for the coordination of all activities concerning the operation of our productive system.

Required Qualifications:

- A Bachelor or Master's degree in Computer Science or similar
- Familiar with Web technologies like Spring, Hibernate, GWT, Tomcat, Java and MySQL
- Experience in Requirements Engineering, Quality Assurance and approval processes like FDA or GAMP 5 are a plus
- Expertise in the healthcare and/or eCommerce sector preferred
- Experience in administration of Mac products desired, since our internal IT infrastructure is based on Apple Mac

Required skills

- Ability for conceptualizing and presenting complex subjects in an organized and clear manner
- Flexible, responsible, stress resistant, goal-oriented
- Very good verbal and written communication skills in English and German
- Excellent social skills

Interested? Send your resume and references to Vivian Persch (cytolonian@cytolon.com).
